My goal

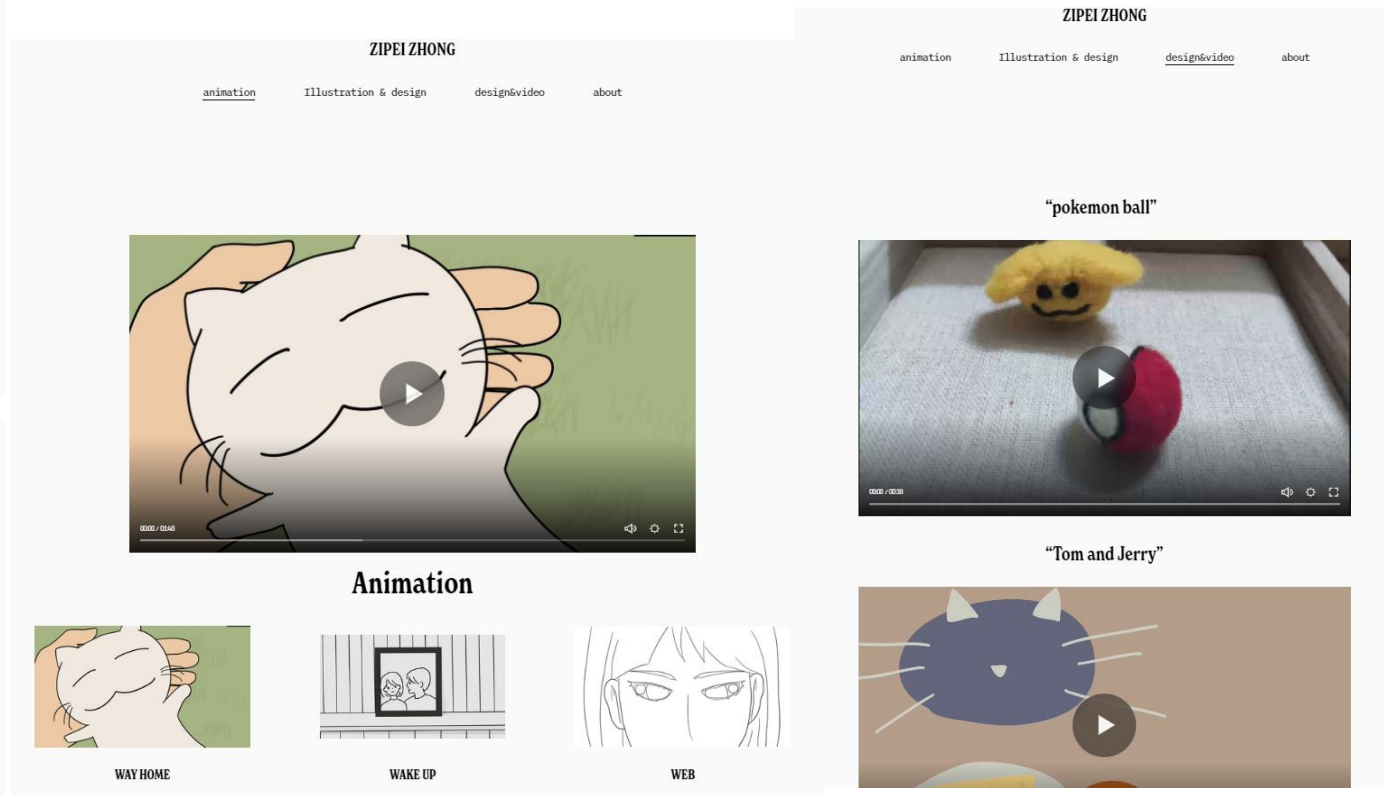

I am a traditional 2D frame-by-frame animator, specializing in animation action, character design, and storytelling. I am particularly interested in the theme and metaphorical depiction of death. Therefore, I aim to portray my understanding of death in various styles of animation and convey positive messages in a more educational manner. As a digital media artist, I hope to create more impactful and educational products.

Online identity

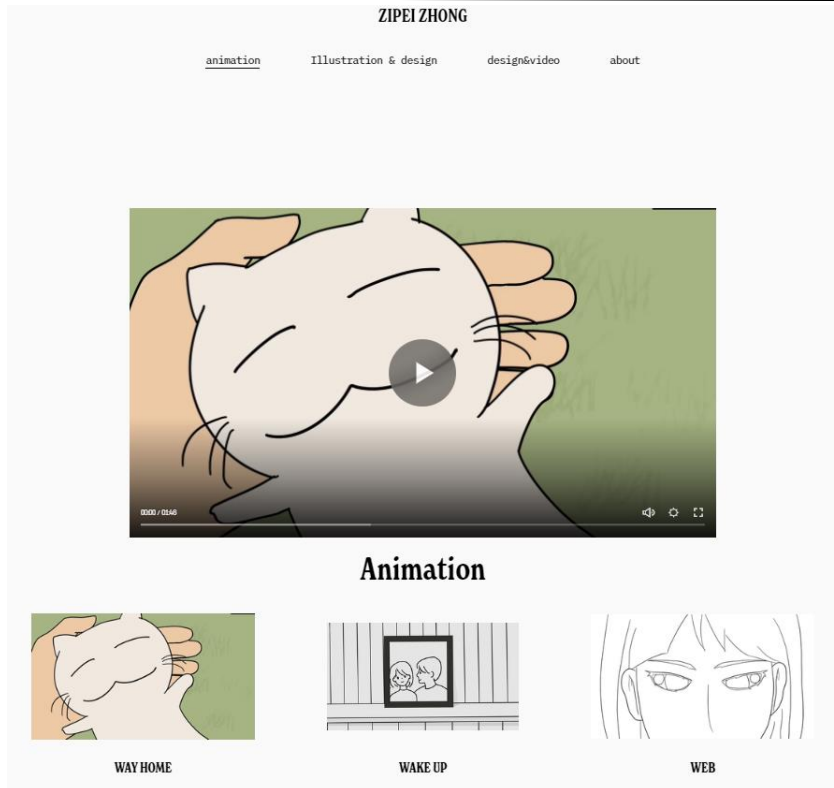

<https://asparagus-blenny-tnlk.squarespace.com/>

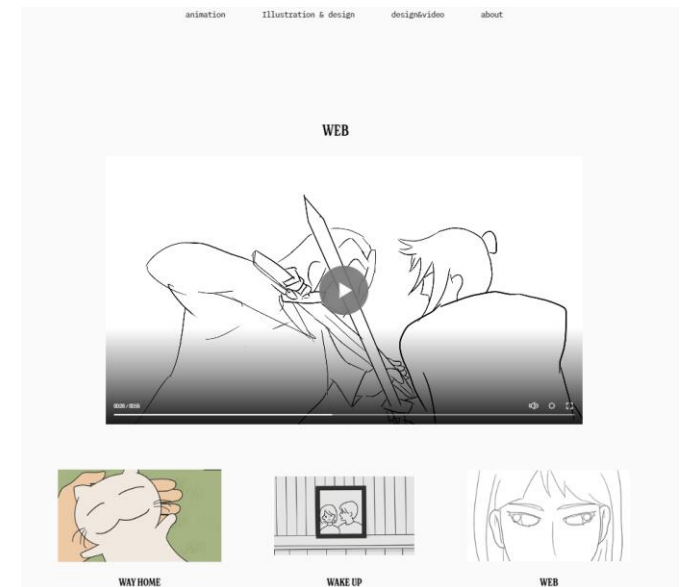

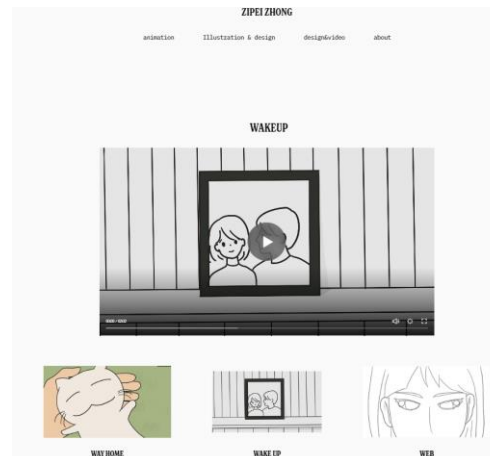

This is the current content of my website, where I have organized my completed works so far. However, their style needs to be unified. In order to make my personal website more appealing, I will continue to search for suitable backgrounds, fonts, and styles.

Online identity

During the first week, my mentor Jadd showed many excellent websites, and I referenced Uyen's personal website to present my content in a more concise manner. Therefore, I used "Animation" as my main page, with my Showreel as the main video. Below are three clickable images that lead to three other animation works that I have completed.

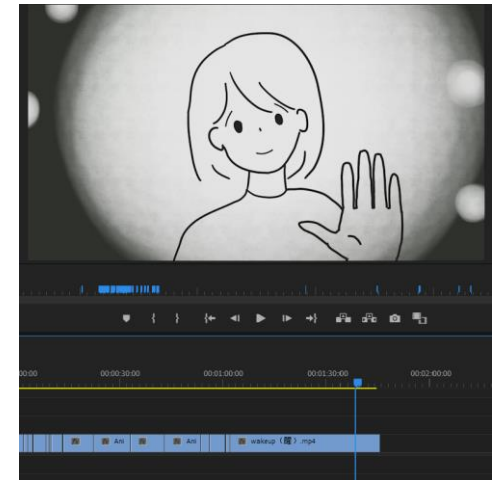

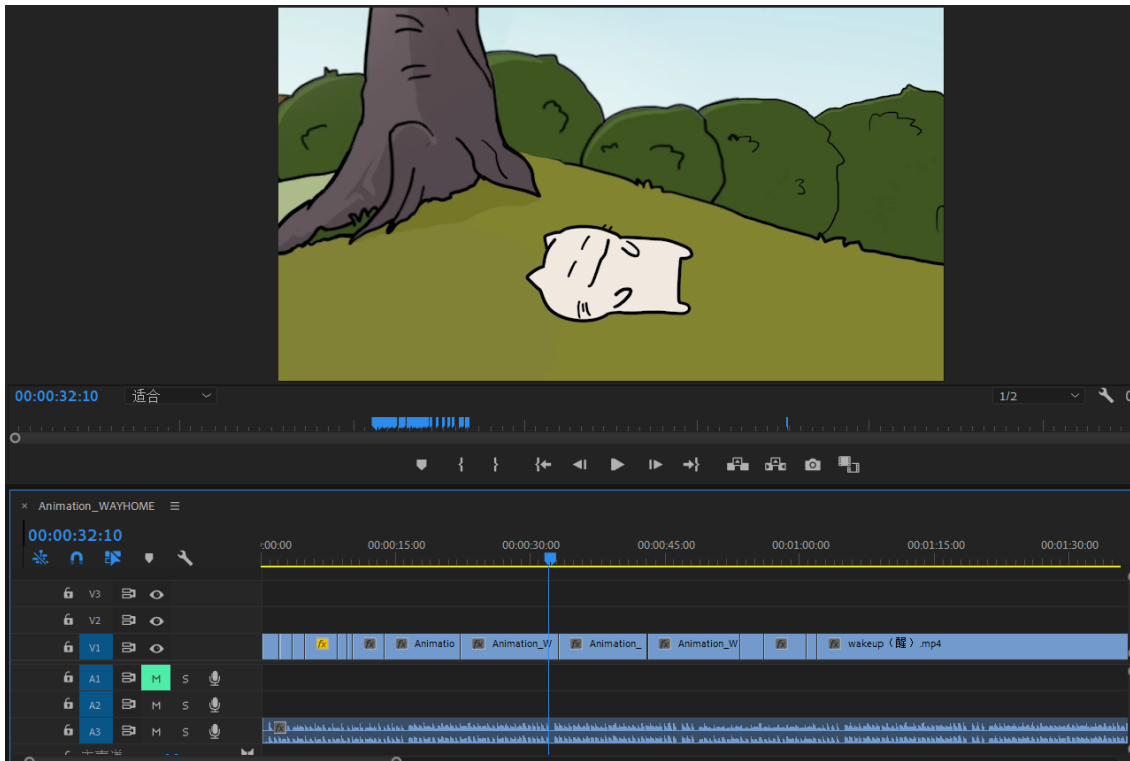

Online identity

I added a lot of content to the Illustration & design page, but I think it would be better to add more text descriptions.

Online identity

Showreel: <https://youtu.be/E8S0BWurLaQ>

Showreel shows the more exciting parts of my animation, such as the demonstration of the action and the compressed story. But I think the video is too long, I will continue to think about the content of the show and the integration of the music.
